

~~366-704-1114 - Not~~

In the brochure that we received it says that you are striving for productivity and harmony for the future generations of Americans. These guidelines will help you identify a corridor that minimizes impact to Humans and Natural environment. First of all we are Americans, second of all looking at this map(<http://www.ci.new-braunfels.tx.us/planning/compplan/ThorPlan1x17.pdf>) of the Loop, right before you get to Highway 46 South (Going Southbound on the loop) you zig zag to the left instead of keeping a straight course. By zig zaging to the left you are inhumanly destroying and sending 4 American Hispanic families and their future generations to live under a bridge. While if you had stayed your course you would be using raw land that cattle has grazed for years and has belonged to the state for over 100 years. Across the highway there is raw swampy land that serves no purpose and would not effect families in any way. TxDOT with all respect please look into this again. To see if there is any New Braunfels Politics being played on us. TxDOT may God put the right decision in your heart. Sincerely the Rangel, Partida, and Herrera families.
