#1 It would be helpful to have a way to show impact of constraints - or decisions made in ranking - (over) (impact of)

#2 Is it possible to show on the map how much property will be needed for interchanges where

loop crosses major roads (+ minus ones?)

#3 How will bisected properties be accommodated - with what criteria?

#1 In other words - Is it possible to evaluate or discuss the cumulative impact of the loop on:

- quality of life in area
- green space
- downtown businesses
- on improved roads in this area
- aquifer use
- air quality - light & noise levels (pollution)

The Project Authorization should reflect the type of road ("Facility") that was authorized, why that road type was authorized, money to be spent at that authorization, etc.

*Omitting water resources as a constraint was a significant oversight by RJ Rivera. Water resources whether groundwater or surface water should always be considered in environmental planning. The result was to skew the priorities of the study to undermine the importance the Edwards Aquifer Recharge Zone should play in this process. Over*
